PROFESSIONAL SUMMARY

Data Science undergraduate at SLIIT with hands-on experience building end-to-end data warehouses, ETL pipelines, machine learning models, and Power BI dashboards. Proficient in Python, SQL, Java, PyTorch, and Power BI, with full-stack experience in Spring Boot, React, and FastAPI. Hackathon champion seeking a Data Engineering, Data Analytics, or Machine Learning internship to turn real-world data into business value.

EDUCATION

SLIIT (Sri Lanka Institute of Information Technology), Malabe Jun 2024 – Jun 2028

Bachelor of Science (Hons) in Data Science | CGPA: 3.5/4.0 | Dean's List: Year 1, Semester 2

Relevant Coursework: Machine Learning (85%), Software Engineering (92%), Data Visualization (87%), Object-Oriented Programming (85%), Database Systems (81%), Data Structures & Algorithms (80%)

Royal College, Colombo 2022

GCE Advanced Level, Physical Science Stream: Physics, Chemistry, Combined Mathematics

AWARDS & ACHIEVEMENTS

Mini Hackathon 2026: 1st Place (Champion), SLIIT Aug 2026

CodeArena 2026 (KDU Hackathon): Top 10 Finalist Team, KDU Sep 2026

Dean's List Award, Year 1 Semester 2, SLIIT Jan 2026

PROJECTS

Enterprise E-Commerce Data Warehouse & BI Pipeline (Olist) Sep 2026 – Oct 2026

Data Engineer & BI Developer

- Designed and built an end-to-end data warehouse for 99K+ e-commerce transactions, integrating SQL Server, CSV, JSON, Excel, and REST API sources through Python ingestion, data cleansing, deduplication, and SSIS ETL pipelines.
- Modeled a Star Schema and departmental data mart, then developed Power BI OLAP dashboards and DAX measures to analyze revenue, customer acquisition, sales, and logistics performance.

  Tech Stack: Python, SQL Server, SSIS, ETL, Data Warehousing, Power BI, DAX, REST APIs

AgriShield AI: Crop Disease Early Warning System Sep 2026 – Oct 2026

Machine Learning & Data Science Developer

- Trained an EfficientNet-B0 classifier using PyTorch transfer learning on 20K+ images across 15 crop disease classes, applying data augmentation and class imbalance handling, and estimated disease severity with OpenCV HSV analysis.
- Built an AI-powered early-warning platform with geospatial outbreak detection, interactive risk mapping, confidence/severity-based human-in-the-loop routing, and Google Gemini integration for multilingual agricultural recommendations.

  Tech Stack: Python, PyTorch, EfficientNet-B0, OpenCV, Scikit-learn, Google Gemini API, FastAPI, React, PostgreSQL

StudyAI: AI-Powered Grounded Learning Platform Sep 2026

AI/ML & Full-Stack Developer

- Engineered a Retrieval-Augmented Generation (RAG) pipeline using semantic document chunking, Google text-embedding-004 vector embeddings, and cosine similarity search to ground AI responses in verified academic materials with source citations.
- Developed context-aware MCQ and flashcard generation with Google Gemini on a MERN-based platform for scalable document processing and personalized learning.

  Tech Stack: Python, RAG, Vector Embeddings, Semantic Search, React, Express, Node.js, MongoDB, Google Gemini API

Smart Hardware Inventory & Sales Management System with ML-Based Stock Prediction Jan 2026 – Jun 2026

Machine Learning & Backend Developer

- Developed a dual-model restocking system with Scikit-learn and XGBoost that classifies whether products need restocking and predicts order quantity, using lag sales, rolling averages, stock gaps, and demand pressure features.
- Integrated the models into a Java Spring Boot backend via Joblib and ProcessBuilder, generating real-time JSON restock recommendations and PDF action plans, with rule-based fallback logic for critically low inventory.

  Tech Stack: Python, Scikit-learn, XGBoost, Pandas, Joblib, Java, Spring Boot, MySQL, REST APIs

Walmart Sales Data Analysis Jul 2026 – Present

Data Analyst

- Analyzed 10,000+ sales records with SQL to identify customer purchasing patterns, branch performance, sales trends, and category profitability.
- Cleaned and structured the dataset, designed a relational database, and generated business insights through SQL queries.
  Tech Stack: PostgreSQL, SQL, Jupyter Notebook, Data Cleaning, CSV

CERTIFICATIONS

Get Started with Databricks for Data Engineering, Databricks Jul 2026
AI/ML Engineer, Stage 2, SLIIT Jun 2026
AI/ML Engineer, Stage 1, SLIIT Jun 2026

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, R, JavaScript, TypeScript
Data Engineering & BI: ETL (SSIS), Data Warehousing, Star Schema, Data Modeling, Power BI, DAX, Apache Spark, Databricks
Data Science & ML: Machine Learning, Deep Learning, EDA, Pandas, NumPy, Scikit-learn, XGBoost, PyTorch, OpenCV, RAG
Frameworks & Libraries: Spring Boot, FastAPI, React, Node.js, Express, Next.js, React Native
Databases: MySQL, PostgreSQL, SQL Server (MSSQL), MongoDB
Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, Linux, Postman

LANGUAGES

English, Sinhala
